

The CSC Group

Company Profile, Milestones and Awards

The CSC Group is an Information Management enterprise, delivering enterprise wide information management and business process automation solutions. We leverage decades of services, software development and workflow design experience to help customers lower costs, improve productivity and achieve significant ROI. Founded in 1964, CSC's innovative approach embraces emerging technologies that complement our own offerings. Key drivers behind CSC solutions allow us to:

- Capture.** Acquire diverse information to provide organized access to critical business records, regardless of origin or format.
- Integrate.** Unify disparate systems and applications to increase information flow, sharpen decision-making and improve customer service.
- Automate.** Streamline operational efficiencies with technology and best practices to deliver sustainable financial results.

Key Differentiators

What differentiates CSC is our depth of Electronic Image Management (EIM) experience when it comes to integrating multiple information silos and departmental systems. We have developed several time-tested workflow interfaces that combine accessibility and manageability for all types of information on a centralized platform. Users are able to pull data from various host systems and share information across their enterprise for improved decision support, data analysis and reporting. Each solution is unique in total capabilities and scalability.

Software, Services and Support

- Imaging and Retrieval Systems
